

SUPPLEMENTARY DISCLOSURES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

On 11 March 2020, the Coronavirus (COVID-19) outbreak was declared, a pandemic by the World Health Organization (WHO)

The Central Bank of Bahrain (CBB) announced various measures to combat the effects of COVID-19 to ease liquidity conditions in the economy as well as to assist banks in complying with regulatory requirements. These measure include the following:

- Payment holiday for 6 months to eligible customers;
- Concessionary repo to eligible banks at zero percent;
- Reduction of cash reserve ratio from 5% to 3%;
- Reduction of liquidity coverage ratio (LCR) and net stable funding ratio (NSFR) ratio from 100% to 80%;
- Aggregate of modification loss and incremental expected credit losses (ECL) provision for stage 1 and stage 2 from March to December 2020 to be added back to Tier 1 capital for the two years ending 31 December 2020 and 31 December 2021. And to deduct this amount proportionately from Tier 1 capital on an annual basis for three years ending 31 December 2022, 31 December 2023 and 31 December 2024.

The aforementioned measures have resulted in the following effects to the Group:

- The CBB mandated 6-month payment holidays requires impacted banks to recognize a one-off modification loss directly in equity. The modification loss has been calculated as the difference between the net present value of the modified cash flows calculated using the original effective profit rate and the current carrying value of the financial assets on the date of modification.
- The Government of Kingdom of Bahrain has announced various economic stimulus programmes ("Packages") to support businesses in these challenging times. The Group received regulatory directive financial assistance representing specified reimbursement of a portion of staff costs, waiver of fees, levies and utility charges and zero cost funding received from the government and/or regulators, in response to its COVID-19 support measures. This has been recognized directly in the Group's equity.
- The mandated 6 months payments holiday included the requirement to suspend minimum payments and service fees and outstanding credit card balances, this resulted in a significant decline in the Group's fees income.
- The Group continues to meet the regulatory requirement of CAR, LCR and NSFR.
- The strain caused by COVID-19 on the local economy resulted in a slow-down in the booking of new financing assets by the Group. During the 6 months ended 30 June 2020, financing assets bookings were 12% lower than the same period of the previous year.
- Decreased consumer spending caused by the economic slow-down resulted in an increase in balances on demand held by the Group, whereas, time deposit balances decreased compared to the same period of the previous year. These effects partly alleviated the liquidity stress faced by the Group due to the mandated 6 months payment holiday.
- The stressed economic situation resulted in the Group recognizing incremental ECL on its exposures.
